Minitab AI

Minitab has been using rule-based artificial intelligence and machine learning for years, enabling businesses to produce trustworthy and accurate results. Now, let us introduce you to Minitab AI. The Minitab Solution Center leverages the power of generative AI and large language models (LLM) to help our customers gain insights into their data and solve business problems more efficiently and effectively. Organizations can opt-out of leveraging this solution if its internal policies don't allow them to use it.

Minitab AI can generate a natural language summary of your statistical results, empowering you to understand your data and determine the next steps.

Minitab Brainstorm is powered by Minitab AI and will supercharge your brainstorming capabilities. All these diagrams are powered by Minitab AI:
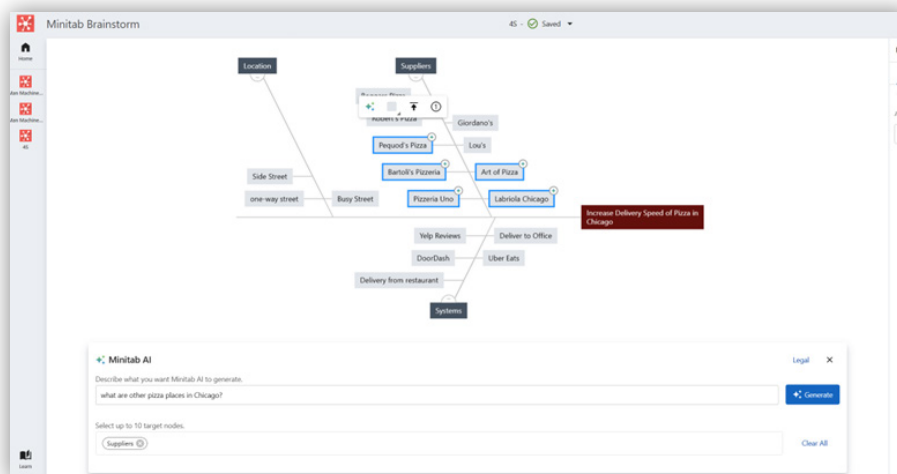

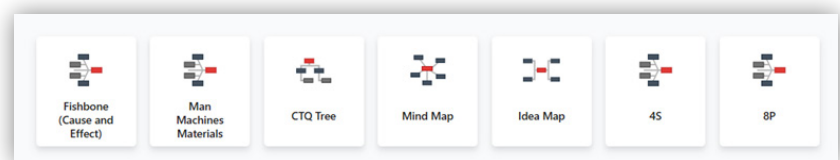

Start asking questions as you create a diagram. Minitab AI will help you uncover possibilities you may not have thought of, generating new siblings or children as you go. Or use the custom prompt to generate new ideas for your brainstorm.

As the Minitab Solution Center continues to grow, so will Minitab AI. Additional generative AI features will be incorporated to complement the current natural language summary feature. The goal is to help users draw the right conclusions about their data more efficiently and effectively.

About The Minitab Solution Center

The Minitab Solution Center is a groundbreaking evolution in how Minitab delivers value to users. The Solution Center unifies several powerful Minitab solutions, including Minitab Statistical Software, into a seamless, integrated platform for data analysis, visualization, brainstorming, and AI-powered insights.
